

AT-A-GLANCE

Argos Risk: Third-Party Risk Intelligence Solutions

OUR COMPANY OVERVIEW

Argos Risk® is a leading provider of Third-Party Risk Intelligence (TPRI) solutions. Formed in 2010, we are experts in financial risk management services to fulfill a need for timely and comprehensive risk mitigation knowledge. We provide innovative and affordable subscription services that help companies manage the risks associated with their third-party relationships, such as vendors, ACH/RDC originators, and lending relationships.

We provide efficient and effective third-party onboarding, ongoing assessments and proactive alerts directly to email and secure dashboards.

Trusted Software-as-a-Service (SaaS) Provider

Automate the scoring and monitoring of critical events with daily alerts which provide you with actionable insights on all your third-party relationships.

Compliance

We provide the tools to help you comply with government and industry standards and best practices.

Real Intelligence

Our propriety algorithms collect, synthesize and present key risk analytics in a comprehensive and easy-to-consume user efficacy.

OUR SUBSCRIBERS

Risk intelligence services are offered to both financial institutions and commercial businesses of all sizes.

A recent report from Forrester Research, titled "Vendor Landscape: Third-Party Risk Intelligence", points out the importance of using Third-Party Risk Intelligence (TPRI) solutions (such as Argos Risk) to "enrich the context your firm uses to make third-party decisions by aggregating and analyzing from a host of sources." This allows for consistent risk scales and methodologies that allow critical comparisons and a common framework to help users evaluate their third parties in a consistent manner.

This report goes on to note that "you're only as strong as your weakest third-party. As business speeds up, organizations are falling even further behind in their attempts to manage and mitigate third-party risks." Argos Risk and our services provide the expanded data breath and advanced analytics that help subscribers uncover often underlying issues not available in most public forums or sources of information. These solutions go beyond financials to provide you with other information that may be critical to assess any reputational risk exposure.

OUR SOLUTION: AR SURVEILLANCE™

AR Surveillance automatically monitors, analyzes, and reports on your selected portfolio. Designed to make the process of risk compliance and best practices as seamless and efficient as possible. Daily, we automate required compliance and internal processes to classify, rate, and alert you with timely information.

HOW IT WORKS

Originating from thousands of data points across multiple vetted financial, industry, and news sources, our proven technology platform monitors, gathers, and analyzes this critical information to create and present 38+ different priority scores. These proprietary algorithms and cumulative processes are known as Argonomics™. These results are delivered through cost effective subscriptions to **AR SCAN™** and **AR SURVEILLANCE™**.

The increasing business reliance on third-party relationships, coupled with downgraded market volatility and threats, is mandating risk professionals manage their third-party risks to an enhanced level. Argos Risk services enrich internal assessment data with external information and analysis.

The diagram below shows our Risk Monitoring Services Strategy - through Argonomics - as to how often our services can be utilized as well as the associated type of risks monitored.

THIRD-PARTY RISK MITIGATION VALUE PROPOSITION
